Dr. Glover provided an overview of the LL.M. in International Taxation to the committee. UF Accountability Goals for Next Reporting Year and for 2012

Dr. Glover provided the committee with background information regarding the accountability goals, stating that the goals are statutorily required and indicating that the university’s funding is tied to meeting these goals. The committee had an extensive discussion regarding the accountability goals and ways the university could easily and without much expense improve certain of the performance areas, such as the six-year graduation rate and minority degree production. Trustee Cunningham made a motion to approve this resolution and forward it to the full board of trustees for approval and Trustee Goldberg seconded the motion. The committee unanimously approved the motion.

Tuition

Dr. Glover next provided the committee with an overview of legislation from the past legislative session affecting the setting of tuition and with a summary of tuition increases for the upcoming school year. Dr. Glover explained that resident undergraduate tuition
and fees for all new and continuing students will increase by almost 5% as will non-resident undergraduate tuition and fees for continuing students. Non-resident undergraduate tuition and fees for new students will increase by approximately 8.8%. Resident graduate and professional school tuition and fees for continuing students will increase nearly 5%, while graduate and professional school tuition and fees for continuing non-residents do not change because of the tuition legislation that was passed. Resident graduate and professional school tuition and fees for new students will increase somewhere between 13.5% and 17% while graduate and professional school tuition and fees for new non-residents do not change because of the tuition legislation. The committee discussed the changes and how these changes related to other AAU schools and Dr. Glover stated that UF’s out of state tuition is in line with, or above, other AAU schools but its in-state tuition is well below AAU schools. Trustee Goldberg requested a vote on each specific proposal individually and the other committee members agreed. The committee voted as follows:

Discussion Items

Tuition Principles and Flexibility

Trustee Morgan discussed the creation of a narrative document the purpose of which is to provide general guidelines regarding tuition adjustments and communications regarding these adjustments. Trustee Morgan stated that the document would be sent to the President for review and comment and then returned to the committee. President Machen indicated that he would also solicit input on the document from the Faculty Senate and students. He emphasized the need to recognize that tuition is not just a cost reimbursement mechanism; it is a market tool and setting tuition at AAU levels would result in vast improvements in faculty.

Alliance Program

Dr. Glover very briefly touched upon the Alliance Program and three new locations.

Academic Learning Compacts

Discussion of this item was postponed until the fall.

Dr. Glover provided brief updates on the Board of Governor’s discussions on targeted programs and on the legislative budget requests.
