

University of Florida Internal Operating Memorandum

Number: 03-8
Date: June 13, 2003
Subject: Honorary Facility and Space Namings

I. Donor/Alumni

In addition to the provisions of the University of Florida Fund-raising Policy, honorary building namings should be consistent with University of Florida Board of Trustees policies and will reflect the honoree's commitment to the mission, vision and objectives of the University.

II. Past-presidents of the University of Florida

An appropriate building will be named for each past university president. Consideration will be given to a building that is associated with the individual's most significant contribution during his or her tenure as president and/or tenure at UF. (Interim presidents may be eligible based on a sustained contribution to the University of Florida.)

III. Vice presidents, deans or other members of the faculty or staff of the University of Florida

Honorary namings of campus spaces, indoors and outdoors, may be appropriate for vice presidents, deans, or other members of the University faculty or staff who have made a sustained contribution to the University of Florida.

All such namings must comply with state laws and policies regarding the naming of state facilities. All persons should be in good standing with the University and at least one year must have elapsed after retirement or separation from the University of Florida.

Exceptions to these rules may be granted by the University of Florida Board of Trustees, who also retain the right to approve or disapprove, or remove any naming in the best interests of the University of Florida.
